

# Dhairya Gangwani

## Professional Summary

I am a Management Consulting enthusiast. I have done over 20+ internships in various Management fields. My passion lies in Public speaking and Content Writing. Recently I have been working on cloud P2P technologies, namely-SAP Ariba, Coupa and Ivalua as an SAP Trainee.

## Experience

### Management Consulting SAP Trainee

#### Interned at KPMG in India, Mumbai

Bagged this internship via Campus Placements as an SAP Analyst in the Management Consulting department. The P2P Cloud platforms that I am currently working on include- SAP Ariba, Coupa and Ivalua.

#### Project Lead/Operations Intern

#### Interned at Spanish BOLO, Virtual Internship

During the period as an operation manager/project lead I handled short listing, recruiting of candidates for different profiles and building an efficient team eventually. I Maintained coordination between the 7 hired candidates and made Sure that all the work was being carried out efficiently. I also got a chance to contribute via my content writing skills for their business proposals to be sent to various universities and MNC's in India.

#### Campus Manager (sales and Marketing)

#### Interned at the Climber- My captain, Virtual Internship

As a campus Manager, I managed a team of 5 interns whom I had to give training on sales, marketing, business development and client communication. I brought in revenue of 40K in the 2 months of my internship. I also represented the company in my campus as the Campus Manager and worked on its publicity through offline and online marketing strategies.

#### Market Research Intern

#### Interned at Crebaco Global Inc, Virtual Internship

I was responsible for researching on over a 100 Block chain companies all over the world and analyze the company on the basis of the coin in use for transactions, their investments, exchange rates, ICO's etc. I created reports for all of these companies in the standardized format. These reports are published online and help clients in identifying the fraudulent Block chain companies and not invest in them eventually.

## Education

### VIT University, Vellore

- B.tech, Electronics and Communication Engineering
- CGPA - 8.93

### Sir Parashurambhau College, Pune

- Higher Secondary Schooling (HSC)
- Aggregate Percentage – 75.54%

### Vibgyor High International School, Pune

- Secondary (ICSE)
- Percentage – 94%

## Projects and Research Work

### Analysis on the major problems faced by Airbnb

People look out for travel options like Airbnb more often now and while doing a case study I analyzed all the problems being faced and how they can be overcome.

### Android App Security Surveillance Robot

A movable bot which is being controlled by an android application. The bot is controlled by an Arduino Uno and L293D Motor Driver. A radar mapping is carried out using ultrasonic sensor and video feed is given to ground station by a camera attached on the bot.

### Claw shaped Robotic Arm

A robotic-arm which acts like a claw to pick up objects. The arm is built with strong card board material and servos are used for the movements of joints. Also the arm is controlled using an Arduino board and is given data using a potentiometer

### IOT based Temperature Sensing and Gas Leak Detection

A device was build for home-security system using a Raspberry-Pi and LM35 temperature sensor and MQ6 Gas Sensor Module.

### Smart Car Parking System

This project aims to showcase which sensor module implementation is best to use for controlling the parking spot detection and availability, with the help of IR sensor module and Ultrasonic module (HC- 5R04) placed in the parking lot.
